Thanks, Jane. I will touch base with York to identify what qualifying statement we should add to the Kilchis “but will remain listed as impaired” sentence and will run it by you, Don, and Martha when I hear back from him. I’m thinking:

“...will remain on the impaired waters list until data are integrated into the state database and assessed for delisting purposes.”

Unless you think we should go a different direction, given your meeting last month.

Thanks, Kary

Hi Kary,

Great job on the stories.

Minor editorial comments attached.

I cc'ed Don Yon, who is the WQ10/SP12 ODEQ contact.

Cheers,

Jayne

Subject: OR Type 2 WQ10 stories: Tillamook River and Kilchis River--two stories for your review

Hi Jayne,

I've attached a copy of the final draft text for the Oregon Tillamook River and Kilchis River WQ-10 Making Progress/Type 2 stories.

We created a SP-12 submission for these a couple of years ago. I adapted the new Type 2 stories from those, but I incorporated updated information on data trends (developed for me by York Johnson, my contact at ODEQ).

Both of these stories are similar, but the Kilchis has data showing ongoing compliance with water quality standards (but not yet delisted). The Tillamook still has occasional violations of the standard, but the trend shows significant improvement over time.

Please note that we're going to work on the trend graphs to make them more legible for the layout version.

Feel free to send these around to other folks as you see fit. York Johnson (ODEQ, North Coast Basin Coordinator) has reviewed these. He helped me with the data, BMP details, and partners and funding information. Perhaps you have other folks in Oregon that you'd think should see these? Or we can wait until they are in layout format and look nicer. Based on what you heard at the meeting, what do you think?

Thanks, Kary
